Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-40 is/are pending in the application.

- 6) ☐ Other: _____.

DETAILED ACTION

This Office action is in response to the election filed July 18, 2006 in which Group II, claims 24-37, was elected. Claims 1-23 and 38-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse.

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 24-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace (US 5,944,858).

Wallace teaches hydrocarbonaceous fuels and additive comprising one or more fuel-soluble manganese carbonyl compounds and one or more fuel-soluble alkali or alkaline earth metal containing neutral or basic detergent salt (see abstract). Wallace

teaches that the composition improves combustion characteristics, form on combustion carbonaceous products of reduced acidity and that the deposition of sludge (slag) on critical engine or burner parts or surfaces is reduced (see abstract). The manganese compound may be any of those set forth at col. 3, lines 31-54 and is present in the composition in an amount sufficient to supply from 0.1 to 5 ppm manganese to the fuel (see col. 2, lines 63-64).

The alkali and/or alkaline earth metal may be lithium, sodium, potassium, and magnesium. The metals may be salts of sulfonates, carboxylates, salicylates, etc (see col. 2, lines 55-62; col. 4, lines 32-34; col. 4, line 58) and are used in an amount sufficient to supply from 5 to 50 ppm alkali and/or alkaline earth metal to the fuel composition (see col. 5, lines 34-37).

Wallace teaches the limitations of the claims other than he does not specifically exemplify a composition wherein the manganese compound is combined with both the alkali metal and the magnesium compound. However, it would have been obvious to one of ordinary skill in the art to include a magnesium compound because Wallace teaches that both an alkali and alkaline earth metal compound may be present in the composition and that magnesium is a preferred alkaline earth metal (see col. 5, lines 32-34 and example 5).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cephia D. Toomer whose telephone number is 571-272-1126. The examiner can normally be reached on Monday-Thursday.
